How to mark a voicemail As you hear on the iPhone you do not have to really listen to a voice mail to mark it as it has already been heard. You can also share audio recording with others through built-in and third-party applications. Touch the voicemail in the lower right corner of the screen. Instead, you can create a personalized greeting with all the style that brings to life. Drag the slide bar to the left or right to rewind or forward the message quickly. Open the configuration application on your iPhone. Sometimes, you know what a message says and you do not need to hear it. The voice mail will be saved or shared as an M4A file. It looks like a square with an arrow pointing up protruding up. Touch Edit in the upper right corner of the screen. Re-enter the finished access code. Touch configured now. You can be safer that your voicemail messages are stored securely, keeping them in a cloud-based service such as Dropbox or iCloud. The number represents all unwanted messages of voicemail. Touch the Information button in the upper right corner of the message. Although it is not as common as a mess of, the people still call themselves, and even leave voice messages at times. Touch deleted messages. Touch Mark as read in the lower left corner of the screen. If something happens to your iPhone, you could lose them. To delete a voicemail from your device, you must make a set of more steps. Touch Play to play your greeting to make sure you like it. Select the communication service with which you want to respond from the message, the call, the video or the mail. Press PLAY to listen to the message. Touch the service you want to share or save the audio. Touch a voicemail to open the playback options.
